

designed for scientists

SPECIAL OFFER /// Valid until 30. June 2019

C-MAG HS 7 control

/// Magnetic Stirrer with square top made of ceramic

It stirs volumes of up to 20l (H₂O) and runs at speeds ranging from 50 – 1500rpm. IKA not only focuses on hardened glass because of visibility, chemical resistance and safety, it also optically changes the game of a magnetic stirrer with a glass surface
